

Wave Meet

Setup on Vercel

1. Push this folder to your GitHub repo
2. Go to vercel.com → Import your GitHub repo
3. In Vercel dashboard → Settings → Environment Variables
4. Add: DAILY_API_KEY =
004181d7ab0376ffbc4614272780d4be5182a62a45ea8fc992e2d9d307a8a42b
5. Deploy — done!

Files

- index.html → the website
- api/create-room.js → backend function (creates Daily.co rooms)
- vercel.json → routing config
